TOPIC(s) : Industrial chemistry

Power ultrasonic technology for green processes

AUTHORS

Pascal TIERCE / SINAPTEC, 7 AVENUE PIERRE ET MARIE CURIE, LEZENNES

PURPOSE OF THE ABSTRACT

Power ultrasonics for Green Processes

For 35 years now, our team made out of researchers and engineers have been working on understanding and making use of power ultrasonic properties. This experience, implemented both in numerous industrial fields and in innovation, enables us to master ultrasound from lab scale, what is the key to success, to industrial production and green processes.

SinapTec offers its technology based on its own world wide patents and assists its clients in developing, designig, manufacturing and commissioning of its equipments.
